Introduction

The Blackboard Mobile platform provides students with access to teaching and learning content and campus information through mobile applications. Blackboard Mobile Learn allows students to access course materials, check grades, and participate in discussions.
What Can You Do With Blackboard Mobile Learn?

**Push Notifications**
Students can now elect to receive automatic, personalized notifications delivered straight to their mobile devices to help them stay informed. Students can receive notifications for new announcements, new graded items, a test being posted, and many other course activities. No more constant checking for midterms being available and grades being posted. Now, course activity comes to you.

**Announcements**
Assignment due? Class cancelled? This is the place where instructors go to post the news students need to know. Students have instant, on-the-go access to the latest announcements, and instructors can post announcements anywhere, anytime.

**Discussions**
The Discussion Board is a key course communication tool for engaging students and promoting learning. It's the place students ask and answer questions, and where instructors can respond to one student for the benefit of all. With Blackboard Mobile Learn, instructors and students can review and post to threaded discussions, as well as create new threads, all while on the go.

**Grades**
Want to know how you did on the midterm or your last homework assignment? Students can view their grades right here.

**Blogs**
Read blog posts and interact with classmates by posting comments on their blogs or responding to comments on your own.

**Tasks**
Help students track and manage the progress of various tasks, from turning in homework assignments to reminders to pick up a midterm or purchase a textbook. Tasks allow students to mark when they've started a project, when it's in progress, and when complete.

**Roster**
Wondering who's in your class? With the class roster, you can quickly see your full class list, making organizing study groups a whole lot easier.

**Media**
Students can access music, videos and images uploaded by their instructors and experience directly from their mobile devices using the appropriate media-specific software.

**Journals**
Read and reflect on your Journal posts and those of your classmates. Both students and instructors can comment on Journals.
Download and Install Blackboard Mobile Learn Application

Android Market

1. Search for Blackboard Mobile Learn
2. Install the Application
3. Accept and Download
4. Wait for downloading to finish
5. Open Blackboard Mobile Learn Application
6. Accept the conditions
7. Enter the credentials
Apple Store
1. Search for blackboard mobile™ learn
2. Select Blackboard Mobile ™ Learn
3. Click on Install.
